EDUCATION

Jomo Kenyatta University of Agriculture and Technology; Juja, Kenya

- *B.Sc. Computer Science*

SEPTEMBER 2021 - NOVEMBER 2025 (Expected)

SKILLS

Programming Languages

Python, C#, Kotlin, JavaScript and TypeScript (Intermediate), Tailwind CSS, C++, Java, PHP

Frameworks

ASP.NET Core, React, NextJS, Jetpack Compose, Flask, Godot

Other Technologies

Docker, Gradle, Git, GitHub

Software

Visual Studio Code, Android Studio, PyCharm, Visual Studio, Rider, IntelliJ IDEA

PROJECTS

Hwcr - CodeDay 18/02/2023

Hwcr was a proof-of-concept USSD app for alerting the authorities on cases of human-wildlife conflict developed for CodeDay Winter 2023 (Nairobi). The submission page is at

<https://showcase.codeday.org/project/cleawteex1010006fgifi6sevgcc>.

I implemented the idea using PHP, MySQL, and [Africa's Talking's telecommunication API](#), and my teammate came up with the idea.

Hwcr was implemented in under 24 hours as required by the rules of CodeDay, and here I gained experience working under time pressure.

Multi-Step Form - Personal Project

This was the solution to the Frontend Mentor project at <https://www.frontendmentor.io/challenges/multistep-form-YVAnSdqQBJ>. With this project, I learned state management using Redux and Redux Toolkit.
